

M101.1

12V Voltage Stabilizer

EN

The kit includes:

- assembled circuit board; manual.
- Store under normal climatic conditions
Shelf life Unlimited

The voltage stabilizer module contains a rectifier and stabilizer on a 7812 microcircuit and is intended for use in simple devices requiring stabilized power supply of 12 volts with a current of up to 1.5 amperes.

Specifications

- Output voltage: 12V
- Ripple level no more than: 120mV
- Maximum load current: 1.5A
- AC input voltage: 11...25V
